

Oliver Valves supports CAUC

On Tuesday 5th April 2011 the Electric Car Team; CAUC had a special visit from a local company: Oliver Valves.

Oliver Valves has been established for over 30 years and is one of the premier needle and ball valve manufactures in the world. With an extensive product range supplying many purposes, it was a pleasure for them to visit us.

That evening a member from the company, Sharon Inch, took time out from her busy schedule to take a look at our team and our successful racing cars. During the visit Sharon took the opportunity to see the team in action; all working together.

Sharon spent an hour with the team, Mr Beardmore and our two engineers and presented us with a cheque for £300! With a new season and new specification to build too this will be of great use as we have just started to construct our new car.

Even though the money is really helpful, for us, as Year 10 students looking at prospective jobs and careers we found that talking to Sharon Inch really helped.

Becky Olpin and Lucy Furber, Year 10

The logo for Oliver Valves, featuring the word "oliver" in red lowercase letters and "valves" in grey lowercase letters.
